Canitas, Villa Paz - Jamundí

## Company description

- **Organic BAS de Colombia** originates from the Valle del Cauca. It is a company dedicated to the manufacturing and marketing of organic products applied to the agro-industrial sector, food and health.
- In 2012 the company **ORGANIC BAS DE COLOMBIA S.A.S.** was created by its founder **Oscar Alberto Lenis**, an entrepreneur who desired personal and family growth and saw an excellent opportunity in the need to promote farm produce abroad.
- By 2019 **Organic BAS de Colombia** opened a new market in oils made from the seed of Sacha Inchi.

## Descripción empresa

### MISSION

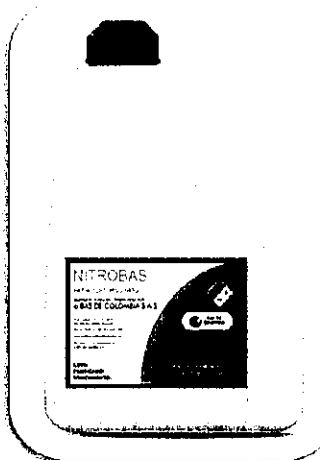

Organic BAS de Colombia is a company from Valle del Cauca dedicated to the manufacturing and commercialization of organic and natural products applied to the agro-industrial, food and health sectors. We are focused on the quality and safety of our products with a commitment to social responsibility and development of our Bas family.

### VISION

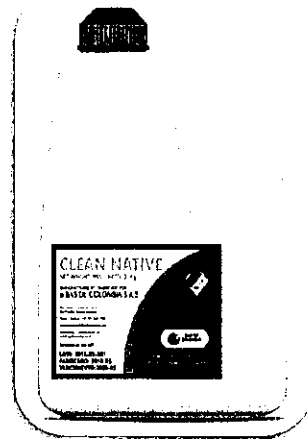

To be a national and international leading company in the manufacturing and marketing of organic and natural products for the agro-industrial, food and health sectors, ensuring the profitability and sustainability of the business in the market.

# OUR PRODUCTS

## AGRO-INDUSTRIAL SECTOR

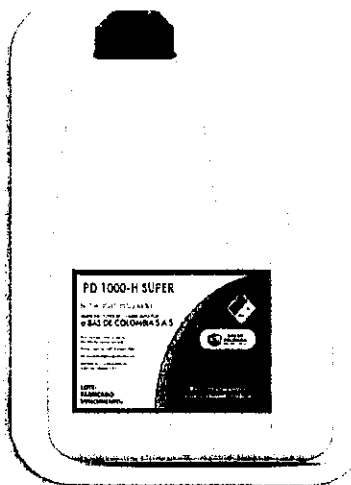

**NITROBAS** → It is an organic fertilizer for soil application through fertirrigation systems as a source of organic nitrogen. It is a formula specially designed for all types of crops. It is an ideal product to obtain high crop productivity due to its high nitrogen content.

**CLEAN NATIVE** → It is an innovative and balanced formulation based on citrus extracts, which efficiently eliminates bacteria, fungi and viruses from foods of animal, fruit and vegetable origin as well as surfaces in direct contact with food and operational sanitation.

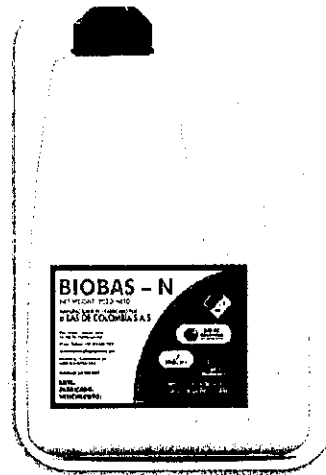

## AGRO-INDUSTRIAL SECTOR

**PD 1000 H-SUPER** → It is a viscous liquid product, with a 95% concentration of the active ingredients, ascorbic acid and glucose. The surface tension of the water is considerably reduced when **PD 1000 H-SUPER** is applied. These inherent properties make it possible for the product to penetrate water bodies affected by crude oil spills decomposing its hydrocarbon action. It also preserves this property when applied to soils and vegetation.

# FOOD INDUSTRY

**BIO BAS** → It contains high bioavailability organic nitrogen, which allows yeasts to perform their biochemical-chemical processes more efficiently due to its bioactive compound.

# SACHA INCHI

The sacha inchi seed has a high content of omega 3 (more than 48%), omega 6 (36%) and omega 9 (8%) fatty acids, so during production, waste can be capitalized to the maximum.

SACHA INCHI OIL

SACHA INCHI CAKE

## BENEFITS

- Strengthens the immune system
- Controls cholesterol.
- Delays the aging process, due to its high rate of antioxidants.
- Combats fatigue, stress, nervous exhaustion and insomnia.

## CAKE BY-PRODUCTS :

- PROTEIN for consumption
- Flour to make bakery products.
- Nutritional supplement.
- Milk

# SACHA INCHI

## SNACKS - PEANUTS

Peanuts are some of the different products that can be manufactured with the sacha inchi seed, which can be found in various flavors:

- Natural Roasted Sacha Inchi
- Sweet Sacha Inchi
- Sacha Inchi lemon
- Sacha Inchi with Salt

## HEALTHCARE SECTOR

Due to its concentration of fatty acids (omega 3 and omega 6) which is higher than in other oilseed plants, it outweighs many we already know like olive or sunflower. In addition, its high content of antioxidants and vitamin E provides restoring and protective properties to the skin. It is also able to regulate hydration and strengthen the skin's natural barrier, delaying premature aging. In natural cosmetics, it is especially suitable for sensitive, dehydrated or dry skin and even for inflamed or irritated skin.

### Subproducts:

- Exfoliating
- Body Cream
- Facial Cleanser
- Shampoo
- Hair treatment
- Soft Capsules

# Export experience

80% of sales are directed to countries such as the USA and AUSTRIA, where we have clients such as LALLEMAND and LESSAFRE. The other 20% is on the national market, among the most important customers is LEVAPAN.

Since 2016 exports have been made to the countries below:

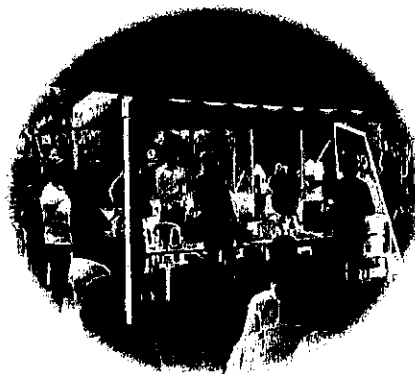

| CUSTOMER  | COUNTRY       |
|-----------|---------------|
| LALLEMAND | AUSTRIA       |
| LESSAFRE  | UNITED STATES |
| PARALEVA  | PARAGUAY      |
| AGRANO    | GERMANY       |

## STRATEGIC ALLIES

Organic Bas de Colombia S.A.S. works with female heads of household who cultivate, transform and commercialize the sacha Inchi seed in the municipality of Tuluá, Valle del Cauca.

We together with a group of farmers from Dabeiba, Antioquia.
