

HARDEN'S OWN HONEY

From Flowers to Hives

From Flowers to Hives

Harden's Own Honey is family owned and managed businesses operating out of Harden, Australia. It was founded by Tanson's family. Beekeeping was a way of life brought to Australia with our family in 1858 and has continued to be Tanson family's livelihood through to the modern day, over five generations later. Our principal apiarist Kenneth John Tanson has been a beekeeper since 1971 and started packing honey in Queanbeyan in 1976. We have been producing 100% Australian honey for more than 40 years. Our heritage, family history and traditional Australian honey processing techniques make us Australian honey specialists.

Honeys within our product selection are either pure flavoured or hand-selected pure honey blends, each with their own unique characteristics and distinct flavours. Kenneth John Tanson is passionate about his honey, transporting bees across New South Wales and Northern Victoria to get the optimum variety of flavours from Australia's diverse and beautiful flora.

Harden's Own Honey products are manufactured by Healthy Max Pty Ltd trading as Harden's Own Honey accredited suppliers of Australian honey. We are a quality assured Australian business. Healthy Max Pty Ltd is our Melbourne factory, it located in Mitcham VIC 3132. Factory's registration number is HFP/16/2797, registering authority by Whitehorse City Council. Harden's Own Honey old factory still located in Harden NSW 2587. Healthy Max Pty Ltd is a proudly Victorian factory and produce the healthy foods including honey products, blackstrap molasses and cereal products.

哈登品牌养蜂场
Harden's Own Honey Apiary

From Flowers to Hives

澳大利亚蜂蜜品牌-哈登蜂蜜 Harden's Own Honey 是由Kenneth John Tanson在1976年创始的。Tanson家族是在1858年由德国奥地利边境地区移民至澳大利亚哈登地区的。Tanson家族已经在澳大利亚从事养蜂业有100多年的历史了。

Kenneth John Tanson先生是澳大利亚为数不多的六代蜂农之一。他1971年随父亲一起养蜂，1976年开始在澳大利亚农村开始灌装和销售瓶装蜂蜜，至今已经有40多年了，他的养蜂路线通常是从新南威尔士州中部地区至南部海岸地区以及维多利亚州北部地区，养蜂经验非常丰富。

如今哈登蜂蜜已经在新南威尔士州和维多利亚州拥有两家蜂蜜生产工厂，年生产瓶装蜂蜜500吨左右。哈登蜂蜜墨尔本工厂位于维多利亚州首府墨尔本东面的Mitcham区，哈登蜂蜜维多利亚州墨尔本工厂是注册在Whitehorse Council下的正规蜂蜜灌装工厂，注册号为HFP/16/2797，哈登蜂蜜的澳大利亚当地销售已经发展到全澳大利亚各个州领地。哈登蜂蜜工厂还为各个大蜂蜜品牌做代加工，市场上很多大牌的蜂蜜都在哈登蜂蜜的墨尔本工厂加工和生产。哈登蜂蜜 “Your Local Sweet”！

哈登品牌依靠哈登蜂蜜的优质蜜源和精湛的生产工艺，以生产天然高质量无污染的澳大利亚原产蜂蜜为目标，为您提供最天然，最地道的100%澳大利亚纯正蜂蜜。

From Flowers to Hives

YELLOW BOX eucalypts are found growing in the rich soils on the foothills through NSW, Victoria & Queensland, west of the Great Dividing Range. One of Australia's choice varietal honeys. It is normally a light amber colour and has a pleasant, fresh aroma and flavour.

IRONBARK have amazing rough, almost black bark and are natural survivors of drought. They are found in open forests on Australia's dry sweeping plains, undulation slopes and hillsides. Ironbark honey is generally amber colored and has an excellent warm, subtle fresh buttery taste.

MANUKA honey is well known for its health promoting qualities and is known as Tea-tree or Jelly-bush. It grows commonly in New South Wales, Australia and contains an additional antibacterial activity which is unique to this type of honey. It may set like jelly or crystallize.

JARRAH HONEY is produced from the Jarrah tree, a eucalypt that commonly grows in Western Australia. It has antimicrobial properties which are measured using the term "Total Activity". It has a full bodied flavor with a semi dark amber coloring.

LEATHERWOOD honey is produced from the leatherwood tree, which is unique to the West Coast of Tasmania. Leatherwood honey has a very distinctive floral flavor and aroma.

RED GUM eucalypt evokes the very spirit of Australia. These magnificent trees grow along the creeks, rivers and billabongs that are subject to flooding. Redgums have the widest distribution of all eucalypts and are indigenous to all mainland states of Australia. The rich golden colored honey has a distinctive full bodied heady fresh fruit flavor.

WHITE BOX is a medium size tree and grows the full length of NSW, mainly on the western slopes and down into northern Victoria. White Box only produces nectar every 2 to 3 years, provided the required rainfall has occurred in the preceding years. The honey is light in color and of medium density it has a warm caramelised flavor.

MILK THISTLE honey is a group of plants that belong to the vast daisy family Asteraceae. They are characterized by prickly stems and leaves with a rounded head of purple flowers. Single flower Thistle honey is most often found in Scotland, Italy and Australia. It has a light amber color fresh aroma and flavor.

ORANGE BLOSSOM is produced from Australian orange groves only. This honey has a very distinct flavor, a unique citrus after taste. This is specialized in a very short flowering, season and so is not as plentiful as other varieties.

MULTIFLORA HONEY is a distinctive blend of pure honeys from Australian forests and pastures. It has an amber colour and pleasant, fresh aroma and flavor. The multiflora honey offered by us is highly suitable for baking and can be consumed by applying on bread or toasts.
