

TANOK 
GROUP

www.tanok-group.com

*A COMPANY SPECIALIZED IN FOREIGN TRADE,
ADVICE IN THE FINANCIAL SECTOR AND
INVESTMENT ANALYSIS We market iron, copper,
lithium, soybeans, corn, sugar, rice, wheat, food
products, livestock, livestock genetics, among others.
WE OFFER FINANCIAL CONSULTING SERVICES
TO OUR CLIENTS REGARDING INVESTMENT
PROFILE, CAPITAL INJECTION AND INVESTOR
PROFILES, IN ADDITION TO ADVISING ON
COMMODITY VALUE AND COMMERCIALIZATION.*

Our work commitment is to provide the CUSTOMER with the answer they want for their needs, for which our multidisciplinary team of professionals combines their knowledge, professionalism, experience and commitment to meet the requested requirements and guarantee the satisfactory result of the operation, complying with all international trade protocols and standards.

All our animal, vegetable, fishery products and their derivatives come directly from the producers, thus confirming origin, quality, compliance with their treatment, care and preservation processes. Strictly following food standards and protocols.

Delivering with their corresponding documents and certifications.

In the financial aspect, we understand that by shortening the links in the commercial chain, we improve communication, shorten operating times, and increase profits. All these points are essential to provide our clients with successful, safe and profitable operations.

MISSION

Offer services and products of excellence to our clients, through our proposals for constant improvement based on quality and innovation, having as a fundamental premise to comply with our values.

VISION

To be recognized as a leading regional company in the management of products and services, through differentiated attention for its quality, professionalism and constant innovation.

OUR VALUES

- Honesty
- Professional Ethics
- Respect
- Responsibility
- Teamwork
- Constant innovation
- Reliability
- Cordiality
- Passion for what we do

We are seriously committed to the
PRESERVATION OF OUR PLANET..

OUR COMMITMENT TO THE ENVIRONMENT

AN INNOVATIVE SOLUTION IN THE FIGHT AGAINST CLIMATE CHANGE

Who We Are

GBM has an interdisciplinary team with more than 60 professionals including anthropologists, sociologists, agronomists, lawyers specialized in certification and programmers, among other disciplines. The team, with presence in 4 countries, aims to be a major player in the fight against climate change.

Verifiability and transparency

We are still in time to prevent life extinction

 <p>Global Temperature +3°C Projected +1.1°C 2021 increase YoY <small>(source: FIEMMA)</small></p>	 <p>POINT OF NO RETURN 2030</p>	 <p>Extreme deforestation 13.7M hectares are deforested per year 70% of the biodiversity dwells in the woods 150 species go extinct every day. <small>(source: CBD, WWF)</small></p>
--	---	---

OUR MISSION

GBM's real-world intervention begins with the selection of land based on specific eligibility criteria (title, free occupancy, active exploitation and environmental conditions). Once selected, the field is subjected to pre-feasibility assessments to determine the feasibility for carbon credits that follow the most rigorous certification standards established by internationally recognized certifiers, including the preparation of a forest inventory, biodiversity inventory and field work with the neighboring communities.

To digitize the land under regeneration, GBM developed in-house software to segment the field into hexagons, each representing a one-square meter surface area, which in turn constitute the basic unit for traceability and marketing. For this purpose, the dissection method of cadastral designation was applied; this entails organizing vectors in a set with a single central point where a coordinate is determined and identification is made based on non-relational databases.
