

Reimagining Intelligent Digital Health for Women

Solution

HeraMED delivers an AI-powered, virtual-first women's health solution with a mission to support care across life stages. HeraMED combines proprietary FDA-cleared devices, continuous remote monitoring, AI-driven insights, and integrated virtual care to enable personalized, connected care delivery. The result is improved access, reduced clinical burden, and better outcomes driven by intelligent workflows that identify risk earlier and guide care between visits. HeraMED integrates seamlessly into existing health system environments and replaces fragmented tools with a scalable, women-centered care model for continuous engagement

Differentiators

- **Empowering women's health across stages** throughout their life span.
- **FDA-cleared devices** to monitor blood pressure, glucose, weight, and in-home fetal activity.
- **Embedded Telehealth Visits** seamlessly launch alongside patient data.
- **AI Clinician Assistant** within an Intelligent Clinician Dashboard.
- **AI-powered virtual companion** with automated workflows and patient-facing insights.
- **Women's Care Designer** for evidence-based plans built from templates.

Partnered with Philips Healthcare

HeraMED has partnered with Philips, a global leader in maternity solutions, to deliver scalable digital care. By combining Philips' trusted monitoring technology with HeraMED's virtual care platform, organizations can expand access, streamline workflows, and improve maternity outcomes.

Value Delivered

- **Improve Quality of Care:** Continuous monitoring and virtual engagement supports earlier intervention and more consistent care.
- **Reduce Clinician Burden:** Up to 50% of face-to-face replaced virtually to better engage patients.
- **Improve the Bottom Line:** Reduces unnecessary visits and readmissions while supporting scalable, ROI-driven programs.
- **Simplify Care Delivery:** A single integrated platform streamlines workflows and fits into existing health environments.

Intelligent Care and Support

HeraMED is redefining how women's health care is delivered through an intelligent, virtual-first platform built for clinical scale. Designed with deep women's health expertise, the platform brings together configurable care plans, AI-powered clinician support, empathetic virtual companions, remote monitoring, and embedded telehealth into a unified experience. Supporting care across life stages – from reproductive and maternal health to chronic condition management and preventive care – HeraMED enables continuous monitoring, automated clinical workflows, streamlined documentation, and adherence focused patient engagement.

Turn-Key Women's Health Solution

Beyond the platform, HeraMED delivers end-to-end services that ensure successful deployment and adoption. Services include care plan design, device fulfillment, EHR integration, patient education, deployment support, and clinical training.

Together, these services provide full support and seamless integration into existing clinical environments—enabling faster deployment, smoother adoption, and scalable women's health programs.
