

Bridging Healthcare Gaps with Home Ultrasound

Pulsenmore (TASE:PULS), a pioneer in connected home ultrasound, is on a mission to make accessible, patient-driven healthcare a reality

We are making ultrasound imaging intuitive, accessible, and patient-centric to bridge the gap between patients and healthcare providers, expanding access, enhancing quality of care, while reducing the burden on healthcare systems.

Products and Roadmap

Pulsenmore's flagship solution reimagines prenatal care. The groundbreaking pregnancy monitoring ultrasound device seamlessly connects to a patient's personal smartphone, empowering every pregnant patient to self-scan and receive remote care, in collaboration with a clinical team.

BENEFITS FOR PATIENTS AND CLINICIANS

Access to Care: We enable access to care in both rural and urban maternity care deserts.

Resource Management: Pulsenmore's solutions provide greater flexibility for caregivers, reducing ER visits, hospitalizations and unscheduled clinic appointments.

Early Detection: Frequent monitoring allows for the early detection of warning signs, enabling timely intervention.

Convenience and Satisfaction: Patients experience increased convenience and satisfaction with our user-friendly solutions.

See how it works:

Strategic Partnerships

- GE Healthcare, with a \$21 million investment and global distribution.
- Clalit Health Services, the largest HMO in Israel.

Future Applications

- Home Ultrasound for women undergoing fertility care (IVF), and patients with congestive heart failure (CHF).

Innovation at Our Core

- Over 70 patents filed and 15 granted.
- Seasoned management team with expertise in ultrasound, R&D, manufacturing automation, AI and cloud architecture.
